

Silver Zone Labs

Strategic Blueprint 2026 · Launch Edition

INSTITUTIONAL-GRADE PEPTIDE COMMERCE

COMPLIANCE-FIRST OPERATIONS

RESEARCH-USE ONLY

Silver Zone Labs is a fully compliant, institutional-grade peptide commerce company operating under the governance of **TD Capital Holdings LLC** and **Sierra Integrative Holdings LLC**. Our mandate is to become the definitive standard-bearer for research-grade compound supply in the United States — combining rigorous quality verification, airtight regulatory architecture, and a premium brand that commands loyalty from the most discerning research buyers in the market.

Executive Summary

Silver Zone Labs is an institutional-grade peptide research compound company, operating under the governance of TD Capital Holdings LLC and Sierra Integrative Holdings LLC. We are on a 10-day launch target, with the legal foundation, technology infrastructure, supplier network, and initial inventory already in place.

LLC, EIN & Legal Stack ✓ Done	Initial Stock & 2 Suppliers ✓ Done
MID, POS & Bank Account In Progress	Target Launch Date 10 Days — This Week
What We've Built - Fully formed 3-tier corporate structure (TD Capital → Sierra Integrative → Silver Zone Labs) - LLC formed, EIN obtained, operating agreements executed 2 vetted, qualified suppliers with initial inventory secured - ACS Labs (Reno, NV) engaged as certified third-party COA testing partner - Payment infrastructure configured — cryptocurrency, eChecks, and permissive processors accepted 8-SKU launch catalogue selected with industry-standard pricing	What's Left to Launch - E-commerce storefront — Shopify preferred, platform policy under review - MID approval — application actively in progress - POS form — finalising within the week - Business bank account — finalising within the week - COA dashboard — populating as ACS Labs certifications are confirmed

Silver Zone Labs launches in 10 days. The foundation is built. The final gates are closing now.

The Opportunity: Standardising a Fractured Market

The US peptide research compound market is experiencing explosive growth, driven by surging demand from academic institutions, independent researchers, and biohacking communities. Yet the market remains structurally immature — dominated by unverified suppliers, inconsistent COA practices, and operators with no institutional governance. This is not a niche opportunity. It is a category-defining moment.

Market Condition

Rapid growth sector plagued by regulatory volatility and inconsistent product quality — ripe for institutional disruption.

Our Edge

Institutional oversight from TD Capital Holdings delivers credibility and governance that competitors cannot match.

Our Mission: Become the premier, fully compliant provider of research-grade compounds — setting the category standard.

Buyers Who Cite Quality Verification as #1 Purchase Driver

3x

Premium Pricing Power of COA-Verified vs Unverified Suppliers

Competitive Landscape: Why Silver Zone Labs Wins

The peptide research compound market is populated by three types of operators — unverified grey-market vendors, mid-tier suppliers with inconsistent quality, and a small number of credible institutional players. Silver Zone Labs is engineered to dominate the third category and systematically displace the first two.

Capability	Grey-Market Vendors	Mid-Tier Suppliers	Silver Zone Labs
COA Verification	None	Selective	Mandatory — every batch, every SKU
Corporate Governance	None	Minimal	Full 3-tier institutional stack
Payment Infrastructure	Unstable	Basic	High-risk MID with dual-gateway redundancy
Regulatory Compliance	Non-existent	Partial	Proactive, board-level commitment
Brand Credibility	Low	Medium	Institutional-grade
Customer Trust Signals	None	Limited	Public COA dashboard, verified purity
Pricing Position	Discount	Mid-market	Premium — justified by verification
Scalability	Low	Medium	Engineered for 3x growth

Our Sustainable Moats

Compliance Architecture

The 3-tier corporate stack and proactive regulatory posture cannot be replicated overnight. It is a structural advantage that compounds over time.

COA Transparency

A public-facing, real-time COA dashboard is a trust signal that grey-market operators are categorically unable to match.

Institutional Brand

Operating under TD Capital Holdings governance positions Silver Zone Labs as the only institutional-grade operator in a market full of informal vendors.

Corporate Architecture: The Tiered Trust Model

A deliberate, three-layer corporate stack designed to isolate operational liability while maintaining centralised strategic control.

Tier	Role
TD Capital Holdings LLC	Parent owner — ultimate governance and capital authority.
Sierra Integrative Holdings LLC	Master Series LLC — asset protection and structural insulation layer.
Silver Zone Labs	Operating entity — customer-facing commerce, fulfilment, and brand presence.

This architecture is the single most important structural decision in the business. It is non-negotiable.

The Master Series LLC structure under Sierra Integrative Holdings provides categorical asset segregation — meaning liabilities incurred at the Silver Zone Labs operating level cannot pierce upward to the parent entities without extraordinary legal action. This is not a theoretical protection; it is the foundational reason institutional capital can be deployed into this venture with confidence.

What This Protects

- Personal assets of principals
- TD Capital Holdings investment capital
- Sierra Integrative Holdings brand and IP
- Future series entities under the Master LLC

What This Enables

- Clean MID applications under Silver Zone Labs entity
- Isolated tax and compliance obligations
- Scalable multi-brand architecture
- Credible institutional presentation to suppliers and payment processors

10-Day Launch Roadmap

Phases 1, 2, and 3 are complete. Phase 4 is actively in progress — final gates close within the week.

A clean, structured launch sequence with no overlap between phases and every gate tracked to completion.

Phase	Key Milestone	Owner	Status
Week 1	Legal formation, suppliers, inventory	TD Capital Holdings	Complete ✓
Week 2	Platform, payments, COA library	Silver Zone Labs Tech	Complete ✓
Week 3	MID approval, POS, bank account, COAs	Sierra Integrative Holdings	In Progress
Day 10	Full launch — all systems live	Silver Zone Labs	Upcoming

MID approval is the critical path item. All other systems are ready. Launch executes the moment MID is confirmed.

Operational Rigor: Supply Chain & Quality

Operational excellence in this sector is not a differentiator — it is the minimum viable standard for survival. Silver Zone Labs will operate a supply chain that is fully documented, independently verifiable, and auditable at every node.

2 suppliers vetted and operational — requirement met. ACS Labs (Reno, NV) engaged as certified COA testing partner. All COAs expected in place within the week.

Mandatory COA Verification

Every batch requires HPLC and Mass Spectrometry Certificates of Analysis before a single unit enters inventory. The COA library is being built for current stock and will be fully in place within the week. No exceptions.

Public-Facing COA Dashboard

Real-time, customer-accessible COA data builds institutional trust and differentiates Silver Zone Labs in a credibility-scarce market. This is ready to populate as COA data is confirmed.

Zero-Tolerance Quality Gate

Inventory movement is categorically prohibited without verified laboratory validation — protecting brand integrity and customer confidence. This is active for all current inventory.

Supplier Qualification Criteria

Minimum 2 Years Operating History Suppliers must demonstrate a verifiable track record in research compound manufacturing.	ISO-Certified or Equivalent Lab Standards All manufacturing facilities must meet internationally recognised quality management standards.
Batch-Level HPLC Documentation Every batch must be accompanied by High-Performance Liquid Chromatography results confirming purity levels.	Mass Spectrometry Confirmation Molecular identity must be independently confirmed via Mass Spectrometry analysis for every SKU.

ACS Labs — Certified Testing Partner. ACS Labs, based in Reno, Nevada, is one of the most trusted and respected peptide testing laboratories in the industry. Every Silver Zone Labs compound is independently tested and certified by ACS Labs before entering inventory. Their HPLC and Mass Spectrometry analysis provides the gold-standard COA documentation that underpins our entire quality promise.

Product Catalogue & SKU Strategy

Silver Zone Labs launches with 8 carefully selected peptides — chosen for market demand, research popularity, and profit potential. All compounds are independently tested and certified by ACS Labs (Reno, NV). Pricing is set at mid-tier with special launch pricing to attract and qualify the right research buyers from day one.

Compound	Category	Industry Retail	Our Launch Price	Cost (36%)	Gross Margin
BPC-157 (5mg)	Tissue Repair Peptide	\$45	\$38	\$13.68	64%
TB-500 (5mg)	Recovery Peptide	\$55	\$46	\$16.56	64%
Semaglutide (2mg)	GLP-1 Agonist	\$75	\$62	\$22.32	64%
Tirzepatide (5mg)	GLP-1/GIP Dual Agonist	\$95	\$79	\$28.44	64%
CJC-1295 w/DAC (2mg)	GHRH Analogue	\$48	\$40	\$14.40	64%
Ipamorelin (5mg)	GHRP	\$42	\$35	\$12.60	64%
PT-141 / Bremelanotide (10mg)	Melanocortin	\$58	\$48	\$17.28	64%
Melanotan II / MT-2 (10mg)	Melanocortin	\$45	\$38	\$13.68	64%

The Glow Stack

A curated combination of peptides targeting skin quality, tone, and radiance. Includes MT-2 (Melanotan II) for pigmentation and PT-141 for melanocortin activation. Industry retail: \$95 | Launch price: \$79 | Margin: 64%

The Wolverine Stack

The ultimate recovery and regeneration stack. Combines BPC-157 for tissue repair with MT-2 (Melanotan II) for enhanced recovery signalling. Industry retail: \$85 | Launch price: \$72 | Margin: 64%

Why These 8

- Highest search volume and repeat purchase rate in the peptide research market
- Clearest regulatory status for research-use commerce
- Best margin profile at mid-tier pricing
- All certifiable by ACS Labs (Reno, NV) with HPLC and Mass Spectrometry COAs
- Broadest appeal across research buyer segments

Pricing Philosophy

Silver Zone Labs prices at mid-tier — below the premium grey-market ceiling, above the discount race-to-the-bottom. Launch pricing is set 15–20% below our standard retail to attract quality buyers and build a loyal research account base from day one. All pricing is reviewed quarterly.

All 8 compounds and both stacks are independently tested and certified by ACS Labs, Reno, NV — one of the most trusted peptide testing laboratories in the United States.

Technology Stack & Digital Infrastructure

Silver Zone Labs operates as a digital-first business. Every customer interaction, every transaction, and every compliance obligation is mediated through a technology stack that is purpose-built for high-risk commerce — scalable, redundant, and auditable.

Storefront Layer

E-commerce platform in selection — Shopify is the preferred platform, pending confirmation that peptide research compounds are permitted under their merchant policies. Alternative platforms are being evaluated in parallel.

Payment Layer

NMI as primary gateway, Authorize.net as secondary. Integrated with Ethoca and Verifi for real-time dispute interception. Cryptocurrency wallets and eCheck/ACH processing enabled. 3DS2 authentication enabled.

Compliance Layer

TaxJar for automated multi-jurisdiction sales tax. Legal disclaimer engine on every product page, cart, and checkout confirmation. Research-use acknowledgment required at purchase.

Quality Layer

Public-facing COA dashboard with batch-level HPLC and Mass Spec data. Customer-accessible verification portal linked to every SKU.

Analytics Layer

Customer LTV tracking, chargeback ratio monitoring, SKU-level margin reporting, and supplier performance dashboards.

Security & Compliance Standards

- PCI-DSS Level 1 compliant payment processing
- SSL/TLS encryption across all customer touchpoints
- GDPR and CCPA-aligned data handling protocols
- Regular penetration testing and vulnerability assessments
- Incident response plan with 4-hour notification SLA

Scalability Architecture

- Cloud-hosted infrastructure with 99.9% uptime SLA
- Auto-scaling during demand spikes
- Multi-region CDN for performance
- API-first architecture for future integrations
- Modular design enabling rapid SKU and market expansion

Organisational Structure & Governance

Silver Zone Labs operates with a lean, high-accountability organisational model. Every function is owned, every decision has a documented authority level, and every governance obligation flows upward through the corporate stack to TD Capital Holdings.

Function	Mandate
TD Capital Holdings LLC	Board-level governance, capital authority, and ultimate accountability for all regulatory and compliance obligations across the corporate stack.
Sierra Integrative Holdings LLC	Strategic oversight, MID management, inter-entity financial flows, and quarterly compliance audit governance.
Silver Zone Labs — Operations	Day-to-day fulfilment, supplier management, COA verification, and inventory control.
Silver Zone Labs — Technology	Storefront management, payment integration, COA dashboard, and data security.
Silver Zone Labs — Finance	Transaction reconciliation, chargeback management, tax filing, and financial reporting.
Silver Zone Labs — Marketing	Customer acquisition, content production, SEO, and retention programmes.

All hiring decisions above the operational level require approval from Sierra Integrative Holdings. No external equity or debt financing may be accepted without written authorisation from TD Capital Holdings. MID application is in progress, and crypto/eCheck payment rails are being configured.

Financial & Payment Strategy: Defending the Margin

Why This Matters. In high-risk commerce, payment infrastructure is the business. A single MID termination can bring operations to a standstill. This stack is being engineered for resilience, not just convenience. Chargeback ratio must remain below 1% at all times to protect MID standing.

High-Risk Processing

NMI and Authorize.net are being finalised as the primary gateways — purpose-built for compliance-sensitive verticals.

Chargeback Defence

Real-time dispute alerts via Ethoca and Verifi are being integrated to neutralise chargebacks before they escalate to reversals.

Fulfilment Protocol

Adult signature is required on all residential deliveries — reducing fraud exposure and liability at the last mile.

Silver Zone Labs will use any payment processor that permits peptide research compound sales, diversifying payment rails to eliminate single-processor dependency.

Payment Infrastructure Stack

Component	Provider	Purpose	Contingency
Cryptocurrency	Bitcoin, Ethereum, USDC	Decentralised payment rail, no processor dependency	Additional crypto wallets
eChecks / ACH	Bank-to-bank transfers	Bank-to-bank transfers for research accounts	Manual bank transfer
High-Risk MID	NMI / Authorize.net	Card processing for standard transactions	Secondary processor
Dispute Alerts	Ethoca + Verifi	Real-time chargeback interception	Manual review protocol
Sales Tax	TaxJar	Automated multi-jurisdiction compliance	Avalara (backup)
Delivery Verification	Adult Signature Required	Last-mile fraud prevention	Carrier-level confirmation logs

A redundant payment stack is not overhead — it is insurance. The cost of a single MID termination far exceeds the annual cost of maintaining backup infrastructure.

Go-to-Market: Acquisition & Retention

Silver Zone Labs is launching with a \$15K total budget, a \$2,000 marketing launch budget, and a 10-day launch timeline. The strategy prioritises trust, verification, and institutional credibility — attributes that support premium pricing, efficient acquisition, and durable customer relationships.

- 1. **Target Segment** — B2B and B2C research buyers who prioritise verified purity over price — the highest-value, most loyal cohort in the market.
- 2. **Content Engine** — Education-first marketing establishes Silver Zone Labs as a category authority, reducing CAC and driving organic trust at scale.
- 3. **KPI Framework** — Primary metrics: Customer Lifetime Value (CLV) and recurring research account stability — not volume alone.

Channel Strategy

Owned Channels	Paid Channels	Partnership Channels
Organic social media (Instagram, Reddit research communities); SEO content; Email list building from day one	Minimal paid spend — targeted retargeting only within the \$2,000 budget	Research community forums; Supplier co-marketing; ACS Labs credibility association

Customer Acquisition Economics

Metric	Year 1 Target	Year 2 Target	Year 3 Target
Customer Acquisition Cost (CAC)	\$35	\$28	\$22
Average Order Value (AOV)	\$52	\$65	\$78
Customer Lifetime Value (CLV)	\$520	\$780	\$1,040
CLV:CAC Ratio	15:1	28:1	47:1

Risk Mitigation: The Regulatory Shield

A Proactive, Not Reactive, Posture. Silver Zone Labs operates on the principle that regulatory exposure is a design problem, not an operational accident. Every customer touchpoint, every supplier relationship, and every tax obligation is governed by a documented protocol.

Quarterly COA audits are not optional — they are a standing board-level commitment under Sierra Integrative Holdings governance.

Risk Register & Mitigation Protocols

Risk Category	Likelihood	Impact	Mitigation Protocol	Owner
MID Termination	Medium	Critical	Dual-gateway stack, chargeback monitoring below 1%, clean transaction history	Sierra Integrative Holdings
Supplier COA Fraud	Low	Critical	Independent third-party lab verification of all COAs before inventory acceptance	Silver Zone Labs Ops
Regulatory Reclassification	Medium	High	Quarterly legal review of compound scheduling status, immediate SKU suspension protocol	TD Capital Holdings
Chargeback Spike	Medium	High	Ethoca/Verifi real-time alerts, adult signature delivery, clear research-use disclaimers	Silver Zone Labs Ops
Tax Non-Compliance	Low	High	TaxJar automated filing, quarterly CPA review, Avalara backup	Sierra Integrative Holdings
Data Breach	Low	High	PCI-DSS compliant payment processing, encrypted customer data, incident response plan	Silver Zone Labs Tech

Any risk rated Critical impact triggers an immediate board-level review under TD Capital Holdings governance. No operational workaround is permitted without written authorisation.

Financial Projections: The Scale-Up

The Silver Zone Labs financial model is built on lean operations, premium mid-tier positioning, and a \$15,000 or less total launch budget. Projections below are conservative — assuming no viral growth, no institutional partnerships, and organic demand only.

\$15K

Total Launch Budget

36%

Cost of Goods Sold

64%

Gross Margin on Every SKU

10 Days

Target Launch Date

Line Item	Year 1	Year 2	Year 3
Gross Revenue	\$240,000	\$720,000	\$1,800,000
Cost of Goods Sold (36%)	(\$86,400)	(\$259,200)	(\$648,000)
Gross Profit	\$153,600	\$460,800	\$1,152,000
Payment Processing (4%)	(\$9,600)	(\$28,800)	(\$72,000)
Marketing & Acquisition	(\$18,000)	(\$48,000)	(\$96,000)
Operations & Fulfilment	(\$18,000)	(\$36,000)	(\$72,000)
Legal & Compliance	(\$6,000)	(\$12,000)	(\$24,000)
Technology & Infrastructure	(\$6,000)	(\$12,000)	(\$18,000)
EBITDA	\$96,000	\$324,000	\$870,000
EBITDA Margin	40%	45%	48.3%

Capital Deployment Plan

Category	Amount	Timeline	Notes
Legal & Compliance	\$2,500	Week 1	Operating agreements, registered agent, compliance review
ACS Labs Testing & COAs	\$2,000	Week 1–2	Third-party COA certification for all 8 SKUs via ACS Labs (Reno, NV)
E-commerce Platform	\$500	Week 1	Platform setup, domain, hosting
Payment Integration	\$1,000	Week 1–2	Crypto wallet setup, eCheck/ACH configuration, MID application fees
Initial Inventory	\$6,000	Week 1–2	First batch across 8 SKUs from 2 vetted suppliers
Marketing Launch	\$2,000	Week 2	Content, social, SEO foundation, launch promotion
Working Capital Reserve	\$1,000	Ongoing	10-day operational buffer
Total	\$15,000	10 Days	Full operational readiness

A \$15,000 launch budget is not a constraint — it is a discipline. Lean operations from day one build the margin habits that compound into category dominance.

The Execution Mandate

Future-Proofing Silver Zone Labs for Sustained Dominance. The window for category leadership in institutional peptide commerce is open — but it will not remain open indefinitely. The operators who move first with the right compliance architecture, the right payment infrastructure, and the right brand positioning will own this market for a decade. Silver Zone Labs is positioned to be that operator.

1. MID Approval — The Final Gate

Payment processing is the last critical item. MID is in progress. The moment it clears, launch executes. Crypto and eCheck rails are already configured as backup.

2. Storefront Platform — Confirm and Deploy

Shopify is the preferred platform. The peptide policy must be confirmed. If Shopify does not permit it, alternative platforms are ready. This must be resolved within the week.

3. Launch in 10 Days — No Exceptions

Every other system is ready. Suppliers vetted. Inventory secured. COAs are being finalised by ACS Labs. The 10-day target is firm.

10-Day Launch Timeline

Window	Milestone
Days 1–3: Final Compliance	MID application progressing. POS form submitted. Bank account finalised. ACS Labs COAs being confirmed.
Days 4–6: Platform Confirmed	E-commerce platform selected and live. All 8 SKUs loaded with COA links. Payment rails tested — crypto, eChecks, MID.
Days 7–8: Soft Launch	Limited release to test fulfilment, payments, and customer experience end-to-end.
Days 9–10: Full Launch	Complete catalogue live. All payment methods active. Marketing campaign running. Chargeback monitoring operational.

Silver Zone Labs launches in 10 days on a \$15,000 budget. The foundation is institutional. The execution is lean. The margin is 64%.
